### Tools

Git    VS Code

### Others

Problem Solving

## PROJECTS

### Portfolio

- **Description** : Designed and developed a personal portfolio website to showcase my projects, skills, and achievements. This website serves as a platform to highlight my work and technical capabilities.
- **Technologies Used** : ReactJS, Bootstrap.
- **Features** : Includes a responsive design, project sections, and interactive elements.
- **Deployment** : Hosted on GitHub Pages.

### Calculator

- **Description** : Built an age calculator to determine precise age from user input, featuring a clean design and real-time results.
- **Technologies Used** : JS, HTML, CSS.
- **Deployment** : Hosted on GitHub Pages.

### Guess My Number Game

- **Description** : Designed a number guessing game where players receive feedback on their guesses and track their attempts until the correct number is found.
- **Technologies Used** : JS, HTML, CSS.
- **Deployment** : Hosted on GitHub Pages.

### Airbnb

- **Description** : Designed a webpage of Airbnb using HTML and CSS, focusing on a clean layout.
- **Technologies Used** : HTML, CSS.
- **Deployment** : Hosted on GitHub Pages.

## STRENGTHS

-  **Quick Learner** : Eager to pick up new technologies and skills quickly.
-  **TeamPlayer** : Enjoy working with others and contributing to group projects.
-  **Creative Problem Solver** : Able to think through problems and come up with creative solutions.
